I hope you enjoy learning new tips, techniques, and ideas from Judy as much as I have! Get a good night sleep and be ready for some great classes! As always, let me know if you have any questions! 701.315.0053

See you in class!

Bobbie

CLASS DESCRIPTIONS

*Step-by-Step Plans for Custom Quilting

Class Description: Have you ever wanted to try custom quilting? Learn how to put together a whole quilt design – including borders, backgrounds, and blocks – using some simple tips and tricks. By picking an overall theme for your designs, we'll adapt the designs to fit your quilting style. Everything from basic designs to modern updates on classics will be featured in this class for all skill levels. Topics Include: • Put together a custom design plan for your quilt • Pick one motif and then find designs that complement it • How to quilt borders and blocks larger than the quilting frame • Auditioning designs using Preview Paper • Tips and tricks for making your designs fit.

*Expand Your Design Portfolio

Class Description: Are you excited to expand your design portfolio but don't know where to start? Beginning with meandering and moving on to other classic fills, we'll spend time drawing and quilting these great textures in this class. Learning how to make all these fills continuously stitched gives you a usable selection of go-to designs for all your projects. Using large and small grids, learn how to scale your designs to give your quilts the perfect design every time. Topics Include: • How to choose a design style and pick the right fills • Use crosshatching and other fills to create special effects • Explore using designs at different scales – micro to large • How to create a consistent design using grids and other methods • Effectively use HQ Micro Handles and adjustable handle bars.

*Can't Have Enough Rulers!

Class Description: Do you love rulers? Are you still looking for new ways to use them? In this class, we'll focus on building an inventory of design ideas using the HQ VersaTool and other HQ rulers. Point to point quilting using markings already on your quilt – like seams or corners – is a cinch with rulers. We'll start with ruler basics, then move on to creating beautiful designs for your entire quilt. 5 Topics Include: • Ruler basics: the right foot, ruler base and ruler • Point to point quilting using the markings on the rulers • Using a ruler for a design base on an entire quilt • HQ VersaTool® : stitch-in-the-ditch, cross-hatch, piano keys, clamshells, and arcs • Quilting around applique or embroidery with rulers.

*Quilting Makes the Quilt (You Make the Quilting!)

Class Description: It's not a quilt till it's quilted, right? We'll start with a simple design, then learn how to pull different elements from that design to build a cohesive plan for your quilting. We'll add echoing, exciting backgrounds, and complementary designs to create a masterpiece. Starting with sketching out your ideas, we'll move on to marking tools to get all your great ideas on your quilt, and then looking at how thread can really make designs pop. Topics Include: • Start with a stencil or other basic design, resize and make it fit • Draw out designs to create a cohesive plan • Add a little extra to your quilting designs: echo, expand, repeat • Explore different grids for laying out your design • Fabric choices and how they can make your designs stand out.

Judy Hays

Judy learned to knit, crochet, and do hand embroidery at a very young age, and began garment sewing in high school. Her love of quilting began with a Bicentennial quilt kit from a magazine and has flourished ever since. She loves to piece quilts using various methods and techniques and is especially fond of traditional patterns and machine embroidered blocks. Working at her local quilt store since 2008, she fell in love with the Handi Quilter longarm machine and all that it could do to help her finish quilts faster. Since her previous career was in computer networking, Judy was especially drawn to the HQ Pro-Stitcher and its endless design possibilities. She purchased an Infinity with Pro-Stitcher and loves to design quilting possibilities using the Pro-Stitcher simulator.

Helping new quilters gain confidence in their quilting skills and finding their own passion is extremely rewarding for Judy. She continues to enjoy teaching various quilt, software, machine embroidery and longarm classes at her local quilt store.

Judy lives in Colorado Springs, Colorado, with her husband, Bill, who “aids and abets” her quilting passion. She and Bill have two married sons, two grandsons and one granddaughter.
